
I'm a tech lover turned developer, looking to create the best experiences on the web while learning and growing along the way. I have worked & built complex web apps, RESTful APIs and single page applications. I like writing clean code, learning about community standards and staying updated with the tech world. I am a quick learner who's able to adapt to new tools easily. Some topics I can handle:

TypeScript · Node · Express · React · Next · AWS · SQL · Jest · Git · Scrum · Agile · English

Experience

Back End Developer

[Desafio Latam](#)

Development of a platform to automate the creation and publication of newspaper articles for children using artificial intelligence. Project made for the newspaper El Mercurio.

Full Stack Developer

[Alkemy.org](#)

Job acceleration that simulated a real work environment where I contributed on a team project using Scrum to facilitate effective development and timely project completion.

Education

Full Stack Development

[Henry Bootcamp](#)

Immersed in over 800 hours of intense JavaScript-focused training. I developed a strong foundation in JavaScript, web development, databases, and the use of popular frameworks for frontend and backend development.

Systems Engineering

[UTN Argentina](#)

Provided me a solid understanding of algorithms, data structures, and the fundamentals of C++ and software engineering. While pursuing Systems Engineering, I discovered a passion for web development and decided to specialize in that area. *(incomplete)*

Projects

Finance Tracker

[Code](#) · [Demo](#)

Dynamic web app allowing authenticated users keep a record of their expenses and incomes and see their balance. Created using the T3 stack, in order to learn and practice new technologies. Deployed on Vercel.

Thumbnail Generator

[Code](#) · [Demo](#)

Image processing web service that allow authenticated users upload images and create various sized thumbnails. Built on top of a serverless architecture using AWS Lambda, API Gateway, S3 and DynamoDB.

Portfolio

[Code](#) · [Demo](#)

Personal portfolio website that showcases my skills, projects, and contact information. Made with Next 13.4 app router. Deployed on Vercel.

Ecommerce

[Code](#) · [Demo](#)

Web app that allow users to browse products, add them to their cart and make orders. Built with Next.js, Express & MySQL. *(in progress)*
